GUIDELINES FOR SLIDES PRESENTATION

- Visuals are concise, simple, and relevant. □ Slides are in a logical sequence in line with the presentation structure.
- Use one message per slide and the amount of text on each slide is limited. □ Free of mechanical and grammatical errors
- Avoid reading from slides: "Remember they are presenters and not newscasters"

Evaluation Checklist

1. Introduction
- Attract and gained the audience's attention
- Established the relevance of the topic

2. Objective/Aim
- Clearly stated the aim and objective of the research study
- Relevant to the research study

3. Literature Review
- Highlighted relevant literature and theory
- Identified Gaps; concepts relevant to the study.

4. Research Methodology
- □ State the research method and why it is appropriate.
- □ Explain clearly in relation to the research
- □ Explain the conceptual framework

5. Discussion on findings/concept
- □ Briefly discuss the outcomes and contribution of the research study

6. Conclusion
- □ An appropriate conclusion is given

7. Q & A: Only 2 (two) questions are allowed for each participant
- Are the answers relevant to your questions? **"Does that answer your question?"**
- The answers are well structured and potentially reveal the presenter's depth of knowledge on the research study.

8. Delivery
- The presenter is VERY WELL prepared and delivers ideas in a clear and concise manner, without depending too much on notes
- Volume, pacing and gestures contribute maximally to the presentation

The presentation is going to be 10 minutes presentation of slides and 5 minutes of Q&A. The evaluation will be 60% Content and 40% Oral presentation.
